

PRABHA IAS IPS COACHING ACADEMY

Stages of Artificial Intelligence

Three Stages of AI

ANI (Artificial Narrow Intelligence)

"Weak AI"

Performs single, narrow tasks

No ability to generalise

Example: Siri, Alexa

AGI (Artificial General Intelligence)

"Strong AI"

Human-like intelligence → can learn/understand any intellectual task

Can generalise knowledge

Does not yet exist

ASI (Artificial Superintelligence)

Theoretical level

Surpasses human intelligence

Can solve problems beyond human capability.
