National Biodiversity Action Plan (NBAP)

Align India's biodiversity strategy with global targets like the Aichi Biodiversity Targets under the Convention on Biological Diversity (CBD).

Biodiversity Loss Caused by habitat fragmentation, pollution, and overexploitation of resources.

Policy Gaps Limited focus on biodiversity in developmental policies.

Community Involvement Insufficient participation in conservation efforts.

Proposed Measures

- **Site-Specific Plans:** Develop management plans for Protected Areas.
- **Community Monitoring:** Promote participatory wildlife monitoring involving local communities.
- **Integration with Climate Goals:** Link biodiversity conservation with climate adaptation strategies.

Significance

NBAP ensures sustainable biodiversity conservation, addressing both national and global challenges.
